**PRELIMINARY NOTICE**

KING CO., Wash.—Preliminary Notice Contract Constructor U. S. Dept. of Agriculture, Bureau of Public Roads, Portland, Oregon, Nov. 1, 1937. The Bureau of Public Roads contemplates the advertisement for bids of a clearing, grading and drainage job on the Stevens Pass Highway, Project 8-C, in King County, Washington. Preparation of plans and special provisions may delay this advertisement until snow would prevent viewing the project in the field. In order that interested contractors may be in a position to submit bids, they are advised to examine the project at this time. The project consists of the clearing, grading and draining of approximately 14 miles extending westerly from the present summit of Stevens Pass and probably the advance clearing of an additional 10 mile westerly from the grading. The drainage will include several concrete box culverts. Funds available for the project are \$150,000. Information regarding proposed plans may be obtained from W. T. Utz, Resident Engineer, at Scenic, Washington. Contractors desiring to look over the project on the ground should do so at once as snow is anticipated in the near future. W. H. Lynch, District Engineer. 29

## BIDS NOV. 30 ON FIRST UNIT FOR CAMPBELL

### Bids Call for Gymnasium, First Unit of \$242,380 School Building Program

Northern California's school construction program received added impetus with the issuance of a call for bids for construction of the first unit of the \$242,380 Campbell School addition in Santa Clara Co.

Bids will be opened November 30 by the Campbell Union High School District.

The PWA recently allotted a grant of \$109,071 to aid in construction of four school buildings, including the acquisition of equipment, improvement of the school grounds by landscaping, fencing, paving, and construction of six tennis courts.

Plans and specifications for the entire project were prepared by Architect Harold H. Weeks.

The first unit, for which bids will be opened November 30, includes construction of the gymnasium, only.

Other buildings in the proposed school construction program include a two-story main high school building, a one-story auditorium and a shop building.

The main school building is to be connected with the auditorium and the present classroom building by arcades. Reasons for the addition, according to a PWA report, are increased enrollment and unit changes in some of the old buildings.

Bids will be received at 7 o'clock on the evening of November 30, and opened at 8 P. M. Plans and specifications may be obtained from the office of Architect Harold H. Weeks, 593 Market street, San Francisco, upon deposit of \$20.00.

It was not announced how soon bids would be called for construction of the remainder of the proposed school plant.

Orders for oil burners totaled \$2,860 during September, as compared to orders totaling 23,479 taken during August, 1937, according to the monthly report of the Bureau of Census.

## Call Los Gatos-Santa Cruz Highway Bids For December 8; Schedule Two Inyo Jobs

SACRAMENTO, Nov. 16.—Bids on another section of the Los Gatos-Santa Cruz Highway today were called for December 8 by the California State Highway Commission. The Commission also called for bids on two highway improvement projects in Inyo county, to be opened on the same date in Sacramento.

Another link in the improvement of the Los Gatos-Santa Cruz Highway, Route 5, was completed some time ago with the opening to travel of the Scott's Valley reconstruction at the Santa Cruz end. The proposed improvement is located between Inspiration Point and Los Gatos, a distance of about 6.3 miles.

2,193,000 Cubic Yards

The contract calls for grading and surfacing with roadmixed surfacing on crusher run base. Principal items include: 127 acres of clearing and grubbing; 2,183,000 cubic yards of unclassified roadway excavation; 2500 cubic yards of ditch excavation; 12,500 cubic yards of structural excavation; 32,000,000 yards station yards overhaul; 35,500 tons of crusher run base; 31,500 tons of mineral aggregate road mixed surfacing; 310,000 pounds of bar reinforcing steel; 2500 cubic yards of Class A Portland cement concrete structures; and 2390 tons of liquid asphalt of various types.

### Two Projects

Bids will be opened December 8 for grading and surfacing with road mixed surfacing about two miles of highway between 1.5 miles west of Bishop and Bishop in Inyo county.

Principal items include: 2600 cubic yards of unclassified roadway excavation; 9900 cubic yards of imported borrow; 1930 cubic yards of mineral aggregate surfacing; 210 tons of hand aphalt; 1050 lbs. of bar reinforcing steel; 3950 lbs. of miscellaneous iron and steel; and 125 tons of sand seal coat.

### Oil Treatment

The third job for which bids were called today involves grading and applying penetration oil treatment to about 2.3 miles of highway between 4.5 miles east of Paumotu Sink and Death Valley National Monument in Inyo county.

## BISHOP LOWEST OF 14 BIDDERS FOR OVERPASS

SACRAMENTO, Nov. 17.—R. R. Bishop, 5017 East Broadway, Long Beach, today submitted the lowest of 14 bids to the State Division of Highways here for construction of a reinforced concrete girder overpass in San Luis Obispo county.

Bishop's low proposal of \$84,399 was more than \$1000 under that of Earl W. Heple, San Jose, the second low bidder.

The overcrossing will carry the State highway over the Southern Pacific tracks about six miles north of San Luis Obispo.

### Total Proposals

Total bids on the overpass contract were:

R. R. Bishop, 5017 E. Broadway, Long Beach, \$84,399.00

Earl W. Heple, San Jose, \$88,535.

## Coffman, Prominent Architect, Killed In Valley Accident

SACRAMENTO, Dec. 1.—Death today claimed two prominent Sacramentans, both widely known in the construction industry.

Instantly killed when the car in which they were riding overturned on the road to Jackson were W. E. Coffman, prominent architect, and A. R. Robertson of the Pacific Portland Cement Company.

The accident occurred shortly before noon, when the car, apparently out of control, left the road and overturned three times.

Mr. Coffman, for 25 years a resident of Sacramento, had been a practicing architect for the past 15 years, and was identified with many of the most important building projects in the Sacramento Valley and elsewhere in Northern California.

### High School Project

Mr. Coffman's most recent large commission was the Fort Bragg Union High School, for which bids were opened November 19. He had done extensive school, commercial and residential work.

Among large projects designed by Mr. Coffman are the Stanford Junior High School in Sacramento, Pierce Joint Union High School at Bros.' store and the Forum building in Sacramento.

Mr. Coffman made his home at 1126 Forty-sixth street, Sacramento. He was 45 years old at the time of his death. Surviving are his widow, Mrs. Luella Coffman, and three children: Virginia, 14; William, Jr., 11; and Richard, 8.

### Widely Known

Mr. Robertson, with whom Mr. Coffman had been driving to Jackson to inspect a project in which they both were interested, likewise was prominent in the building industry and widely known among architects, engineers, material men and contractors.

Mr. Robertson was Pacific Portland's Sacramento Valley representative, and made his home at 632 Thirty-seventh street, Sacramento.

## November S. F. Building Total Best Since August; \$1,152,485 Volume Reflects Gain

Six hundred and fifteen building permits were issued in San Francisco during November for construction estimated to cost \$1,152,485, the largest permit total since August, according to figures released yesterday by Chief Clerk S. J. Rosenblum of the Central Permit Bureau.

The building level returned to that of the first two months of the year and showed a substantial increase over September and October.

Indications were that the total for the entire year will exceed \$20,000,000, making 1937 the biggest building year since 1931 when more than \$21,000,000 in permits were issued. According to figures, 7,276 permits have been issued in San Francisco during the first eleven months of 1937 for construction costing \$19,314,609. This time last year only 6,834 permits had been issued for work costing \$16,845,389.

### Over Last Year

This month's total showed a slight gain over the November, 1936, total of \$1,073,497, and a substantial gain over the October, 1937 figure of \$881,530. The November total was more than \$100,000 higher than the September figure of \$907,979.

Frame construction dropped as against last month and November, 1936. This month 110 permits were issued for frame construction costing \$483,423. The November, 1936 total was \$675,815; the October figure was \$577,300.

Considerable gains were registered in the Alteration division. Four hundred and ninety-five permits were issued in November for alterations costing \$321,936. This figure was considerably higher than the November, 1936 alteration total of \$292,107, and the October total of \$268,630.

No Class B, public building or Exposition permits were issued last November. This November the Class B total was \$89,600; the public building total, \$10,491; and the Exposition total, \$215,535. No permits were issued under these classifications in the October.

In issuing the figures Mr. Rosenblum pointed out that only six Exposition permits have been issued this year for work costing \$911,334; last year four permits were issued for construction costing \$2,951,514. Excluding Exposition per-

## Veteran Works Dept. Employee Is Retired

In 1899, thirty-eight years ago, B. Louis Tyrrel, known affectionately to the hundreds who deal with the San Francisco Department of Public Works as Louis, started his career at the City Hall; yesterday he aided Director Worden for the last time.

For yesterday Louis, office assistant, retired.

One of the best known figures at City Hall for years, Louis was greeted by nine out of ten people who walked its corridors. Louis knew everybody, and everybody knew Louis.

A few days ago his co-workers gave him a party. Yesterday Director Worden prefaced a meeting of the Department of Public Works with a short farewell address, lauding Louis for his faith and integrity during his long service in behalf of San Francisco.

He said, the permit total for the first eleven months of 1937 is almost \$5,000,000 higher than the total for the same period last year.

Following is a classification of permit figures for November, 1937, and November, 1936:

	Nov., 1937	Nov., 1936
A	\$ 89,600	\$ 35,000
B	7 31,500	6 70,575
C	110 483,423	139 675,815

## SCHEDULE BIDS FOR STOCKTON HOSPITAL UNIT

Proposals on 2-Story Reinf.  
Concrete Addition Open  
December 28

SACRAMENTO, Nov. 30. — Another unit in the State institutional building program went out for bids today as the State Division of Architecture authorized advertisement of contracts for construction of a new unit at Stockton State Hospital.

The new unit will be a ward building for acute disturbed female patients. Bids are to be opened December 28.

The building will be two stories in height, of reinforced concrete construction, and will have steel sash and tile roof.

### Four Contracts

Separate bids will be taken for general work, electrical work, heating and ventilating work, plumbing work.

The new unit will be financed entirely from State funds, since it was not included in the group of seven projects which recently received allotments from the Public Works Administration.

## SMALL CONTRACTS OCCUPY DEPT. AS YEAR NEARS END

Opening the final month of 1937, Director William H. Worden of the San Francisco Department of Public Works, yesterday received low bids aggregating \$13,714 on three city contracts.

Low bidder on the largest job, involving reconstruction of Harriet street between Folsom and Harrison streets, was Charles L. Harney, at \$7,350.80.

Second lowest bidder was A. G. Raish, at \$7632.25. Other bidders were: Pacific Pavements, Ltd., \$7,652.45; Fay Improvement Company \$7774.15; Lowrie Paving Company, \$7874.15; Eaton & Smith, \$7873.

The second largest job for which bids were opened yesterday involved widening Second street between Brannan and Townsend streets. Low bidder was A. G. Raish, at \$4,596.80. Other bidders were: The Fay Improvement Company, \$4,940.30; Eaton & Smith, \$5621.95; Charles L. Harney, \$5725; Lowrie Paving Company, \$5836.15; and Pacific Pavements, Ltd., \$667.20.

Standard Fence Company, at \$767.16, submitted the low bid for constructing a base-ball backstop and fencing at Funston Field. Final bids were called to be opened December 15, for construction of a Bureau of Identification Penthouse at the Hall of Justice. Bids received recently on the job were rejected.

## Griffith Co., N. M. Ball Sons Low Bidders On \$624,633 State Highway Division Jobs

SACRAMENTO, Dec. 1.—Low bids aggregating \$624,633 today were submitted to the State Division of Highways for construction of an undergrade crossing in Shasta county, and for grading and paving 19.1 miles of highway in Kern county.

The largest job involved grading and paving with asphalt cement concrete about 19.1 miles of highway between one mile north of Grapevine Station and ten miles south of Bakersfield in Kern Co.

## BUILDERS HOLD ANNUAL MEETING IN S. F. DEC. 10

Central Calif. Chapter, A.G.C.,  
Making Final Preparations  
For Big Affairs

Preparations were nearing the final stage today for the annual meeting of the Central California Chapter, Associated General Contractors of America, which will be held December 10.

Secretary-Manager William E. Hague declared the meeting will be one of the finest of recent years and indicated a record attendance at their annual affair is anticipated.

The gathering will open in the afternoon at the chapter meeting room, 211 Sharon building, San Francisco, with the regular business sessions scheduled to start at 3:30 P. M.

Officers and committees will present their annual reports. Special orders of business will include thoroughgoing discussions of labor relations and of new methods of building construction.

Following the business sessions, the annual dinner will be held at 6:30 P. M. in the Empire room of the Sir Francis Drake hotel. An unusual entertainment program has been arranged by the committee in charge.

Members of the committee on arrangements are: R. Walberg, chairman; Al Courtney, Louis C. Dunn, Fred J. Early, Jr., S. G. Johnson, F. R. Meyer, E. C. Moore, C. F. Parker and W. C. Tait.

"Members of the association from all parts of Northern and Central California will be here for the meeting," said Mr. Hague. "We expect it will be one of the biggest and best we have ever held."

Since comfortable seating capacity of the Empire Room is limited, members were urged to make their reservations immediately in order to avoid last minute disappointment.

10,000 cubic yards of imported subgrade material; 138,000 lbs. bar reinforcing steel; 365,000 lbs. of structural steel; 16,000 lbs. cast steel; 67,000 lbs. wrought iron plate and 1350 cubic yards Class A portland cement concrete.

## BUREAU ASKS BIDS ON TWO ARIZONA JOBS

District Engineer C. H. Sweetser of the Bureau of Public Roads yesterday issued two calls for bids for construction of a bridge and surfacing of 14.605 miles of highway in Coconino county, Arizona.

Bids on both jobs will be opened in the Federal Office Building, San Francisco, on December 28.

The first contract calls for construction of the Wilson Canyon Bridge on Section B of Route 7, the Oak Creek National Forest Highway in Coconino National Forest.

Principal items include: 1100 cubic yards of unclassified excavation for structures; 200 cubic yards of Class B concrete; 395 cu. yds. of Class D concrete; 92,000 pounds of reinforcing steel; 510,000 pounds of structural steel; and 165 cubic yards of cement rubble masonry.

### Bituminous Surfacing

The second job involves placing bituminous treated crushed rock surfacing (Class F) on Sections A1 and A2 of Route 1, and Sections A1, A2 and B of Route 2 in Grand Canyon National Park. Length of the project is 14.605 miles.

\$31,855 for grading and applying penetration oil treatment to 2.9 miles near Death Valley National Monument, Inyo county.

Total bids on the Inyo job were:

Isbell Const. Co., Reno.....	43,532
John Rocca, San Rafael.....	44,836

Three bids were received for grading and surfacing about two miles near Bishop, Inyo county. Lowest of these was \$15,433, submitted by Basich Bros., Torrance. Other bidders were Young & Son Co., Ltd., Berkeley, \$20,801; and Triangle Rock & Gravel Co., San Bernardino, \$22,548.

## EATON & SMITH LOW ON DEPOT INTERIOR WORK

**Cory & Joslin Bid Heating, Ventilating; Reliable Elevator Low on Electrical Work**

SACRAMENTO, Dec. 7. — Low bids aggregating approximately \$473,000 were submitted to the office of the Constructing Quartermaster at the army air depot near here today for construction of interior work in the Air Corps Engineering Shop and Repair Dock.

Low bidder for general work, which includes partitions, floors, doors, sash, plumbing and gas fitting, was the San Francisco firm of Eaton & Smith, 715 Ocean Ave., at \$306,500.

Other bidders on the first proposition, for general work, included James I. Barnes Construction Co., St. Louis, \$319,000; MacDonald & Kahn, San Francisco, \$322,223, and K. E. Parker Co., San Francisco, \$322,390.

On Item II, for heating and ventilating, Cory & Joslin, Inc., 50 Hawthorne street, San Francisco, submitted a low bid of \$59,783.

Only two other bids were received for heating and ventilating work. They were from Anderson & Rowe, San Francisco, at \$61,315 and M. R. Carpenter, Sacramento, at \$68,455.

Reliable Elevator Works, 619 California street, Sacramento, submitted a low proposal of \$107,200 on Item III, for electrical work. Charles A. Langda's, San Francisco, at \$115,390, and Scott-Buttner Electric Co., Oakland, at \$119,767, submitted second and third low bids, respectively.

Other bidders for electrical work were Kenney Electric Co., San Francisco, \$125,956; Alta Electric & Mechanical Co., San Francisco, \$132,221; Abbott Electric Co., San Francisco, \$137,300; Central Electric Co., San Francisco, \$144,000; and Luppen & Hawley, Inc., Sacramento, \$141,988.

More than 1600 building trades mechanics were at work in San Francisco last month, according to the Industrial Association job-to-job survey.

## STATE INVITES BIDS ON FOUR HIGHWAY JOBS

San Joaquin, Fresno, Los Angeles, San Diego County Projects Advertised

SACRAMENTO, December 14.—The State Highway Commission today authorized two surfacing jobs and two bridge construction projects. Bids will be opened in Sacramento January 5; in Los Angeles, January 6; and in San Diego, January 7.

The first contract involves construction of a steel girder bridge and approaches about three miles south of Sanger in Fresno County. The bridge will consist of five 74-foot spans and two 65-ft. spans.

Principal items include: 12,500 cubic yards of roadway embankment; 80,000 pounds of bar reinforcing steel; 215,000 pounds of structural steel; 1050 lineal feet of timber railing; and 2100 lineal feet of steel piles.

### San Joaquin Grading

The second northern California contract calls for grading and surfacing with untreated crushed gravel or stone about 5.5 miles of highway between Bacon Island Ferry and Mandeville Island Ferry in San Joaquin county.

Unit prices will be submitted on four items. They are 500 million gallons of water; 10,000 cubic yards of unclassified roadway excavation; 65,000 station yards overhaul and 14,850 tons of untreated crushed gravel or stone surfacing.

On January 6, bids will be opened in Los Angeles for grading and surfacing with plant-mixed surfacing 0.9 mile of approaches and construction of a concrete bridge at Oso Creek in Orange Co. On the following day bids will be opened in San Diego for construction of a reinforced concrete slab bridge across Sweet River between National City and Chula Vista on Highland avenue in San Diego Co.

Sales of Class I mechanical stoppers for the first ten months of 1937 totalled 78,543 units, a substantial gain over the total of 63,422 units sold during the same period in 1936 the Bureau of Census reports.

## PACIFIC GROVE P. O. ADVERTISED

(Special to Daily Pacific Builder)

WASHINGTON, D. C., Dec. 14.—Bids for construction of the U. S. Post Office at Pacific Grove, Calif., were invited here today by the Treasury Department. Proposals will be opened in Washington January 25, it was announced.

The Pacific Grove building will cost in the neighborhood of \$74,000, according to estimates of necessary funds. Plans, as in the case of most other post offices, were prepared in the offices of Treasury Department supervising architect.

## Hammill to Succeed Saph As Structural Engineer President

Harold B. Hammill was elected President of the Structural Engineers' Association of Northern California for 1938 at the meeting of the Board of Directors last week. Sidney S. Gorman was elected Vice President and Alfred P. Fisher, Secretary-Treasurer.

The Directors are: H. M. Engle, Sidney S. Gorman, Frederick F. Hall, Harold B. Hammill and A. V. Saph, Jr.

A. V. Saph, Jr., is the retiring President, and the retiring directors are: William Adrian, John J. Gould and Jess Rosewald.

The past year was the most important in the history of the Association, with a larger membership, greater member attendance at the monthly meetings, and with more accomplishment in the operations of the standing committees, the board reported. The most important work of the year was the sponsoring of the State Engineers' Convention at Sacramento last March, when five hundred engineers of various classifications met with State Legislators and other prominent business men for discussion of the theme, "The Place of the Engineer in Public Affairs."

## CALIF. BIDDER LOW ON HICKAM FIELD QUARTERS

Robert E. McKee Submits Apparent Low Total Proposal at \$802,000

Robert E. McKee, Los Angeles, at \$802,000, yesterday submitted the apparent low total bid to the Constructing Quartermaster for the construction of 42 NCO quarters and 39 officers' quarters at Hickam Field, T. H.

Bids were taken on three propositions. They were: (1) NCO quarters; (2) field and company officers' quarters; and (3) combination of Propositions 1 and 2.

The bid of Robert E. McKee on Proposition 1 was \$311,000; on Proposition 2, \$509,000.

The second lowest bidder was MacDonald Construction Company of St. Louis. Their bid was: (1) \$324,240; (2) not available; (3) \$855,000.

Eser-Wikholm, Ltd., Los Angeles, submitted a bid totaling \$326,400 on Proposition 1. The bid on Proposition 2 was \$538,000, and no bid was submitted on the entire job.

Tucker-McClure, Los Angeles, submitted a bid totaling \$863,190 on Proposition 3. The firm did not bid on other propositions.

Two bids were received at Hickam Field. They were: Wm. Wills, Seattle, at \$898,000; and E. E. Black, Ltd., Honolulu, at \$899,000.

Only the names of four low bidders were released locally. Complete details will be announced shortly, according to officials.

## ENGINEER W. H. ARCHER TAKES NEW QUARTERS

W. Harry Archer and Associates consulting and industrial engineers, announce that they have moved to a new location at 130 Bush street. The new telephone number is EX-brook 5586.

W. Harry Archer and Associates specialize in factory designs. They furnish technical advice on mechanical, electrical, power plant, chemical, air conditioning, time study and efficiency problems, it is announced.

## CITY RECEIVES PROPOSALS FOR MINOR PROJECTS

Utilities Commission, Dept. of Public Works Open Bids On Small Jobs

The San Francisco Department of Public Works and the Public Utilities Commission yesterday opened bids on six minor jobs in the current municipal public works program.

The Public Utilities Commission received seven bids on its lone contract which called for laying 8-inch cast iron mains in Nineteenth avenue between Taraval and Wawona streets. Two thousand lineal feet of pipe were involved in the job.

Low bidder was W. J. Tobin, at \$1161.90, followed by Martin Murphy, at \$1222. Other bidders were: The Fay Improvement Company, \$1252; Underground Const. Co., \$1380; Charles L. Harney, \$1445; San Francisco Water Department, \$1481, and E. J. Treacy, \$1682.10.

Director William H. Worden of the Department of Public Works received three bids for the improvement of Innes avenue from Hawes to Ingalls, and of Ingalls from Innes to Jerrold avenues, largest of two formal bids for street jobs opened yesterday.

Low bidder was Richmond Const. Co., at \$2839. The other bidders were: Charles L. Harney, at \$4490, and Eaton & Smith, at \$4650.

### Sand Removal

Piombo Brothers at \$595, submitted the low bid for removing approximately 300 cubic yards of sand and rubbish from sections of Quintara and Pacheco streets. The second lowest bidder was Charles L. Harney, at \$675, followed by Eaton & Smith, at \$790. Eight bids were received.

Schrader Iron Works, Inc., at \$4250, submitted the low bid on Proposal No. 1 for construction of a Bureau of Identification penthouse at Hall of Justice. They submitted no bid on Proposal 2. The only other bid was offered by Soule Steel Company with \$4495 on Proposal 1, and \$7926 on Proposal 2. This Elevator Company, at \$2297 submitted the low bid for alterations to elevators at City Hall. Westinghouse Electric Elevator Co. at \$3124, submitted the only other bid.

Production of commercial steel castings during the first 10 months of 1937 totaled 924,632 short tons, as compared to production of 653,292 short tons during the same period in 1936, according to the Bureau of Census.

Shipments of deep well water systems during the first ten months of 1937 amounted to \$2,128,054, a substantial gain over shipments totaling \$1,632,445 during the same period in 1936, the Bureau of Census reports.

## PAGE ANNOUNCES S. P. AGREEMENT

John C. Page, U. S. Reclamation Commissioner, his brief visit in San Francisco this week demonstrated, is a man who can crowd a lot of action into a few short hours.

Mr. Page, here from Washington, D. C., announced Tuesday that a plan whereby a tunnel at Shasta Dam site would carry Southern Pacific trains around work while the dam was under construction, was being considered. Before he left for Boulder City, Mr. Page was able to announce that the plan would be followed, that a satisfactory agreement had been reached, providing for construction of the 37-mile S. P. relocation by the company, which would be reimbursed by the federal government.

## LET LOS GATOS HIGHWAY LINK, INYO PROJECTS

Heafey-Moore, Fredrickson & Watson Win 6.3-Mile Grading Contract

SACRAMENTO, December 13.—Award of three State Division of Highways contracts aggregating approximately \$942,000 was announced here today by Earl Lee Kelly, State Director of Public Works.

Largest of the three contracts let today went to Heafey-Moore Co. and Fredrickson & Watson Const. Co. of Oakland, and covers grading and surfacing about six and three-tenths miles of the new Los Gatos-Santa Cruz highway.

The contract price is \$895,045. The Oakland contractors at this figure last week submitted a low bid less than \$650 under that of Macco Construction Co. of Clearwater.

### Wide Bid Range

The project is one of the largest on the current calendar of the State Division of Highways, and bidding for the work covered a wide range of figures.

Located between Inspiration Point and Los Gatos in Santa Cruz and Santa Clara counties, the project will be under construction shortly, it was indicated.

The other two projects for which contracts were let today both are located in Inyo county. Awards were made as follows:

Basich Bros., Torrance, \$15,433, grade and surface two miles near Bishop.

Silva & Hill, Glendale, \$31,855, grade and oil 2.9 miles near Death Valley National Monument.

## WEBB RULES ON REGISTRATION OF FIRM NAMES

Opinion Clarifies Point in State Contractors' License Regulations

Attorney General U. S. Webb in an opinion requested by Earl S. Anderson, Registrar of Contractors yesterday ruled on name styles as they must be registered by contractors applying for state licenses.

The question arose out of a rule adopted by the Contractors' State License Board providing that every applicant for a contractor's license must register the name under which it is doing business as required by Section 2466 of the Civil Code, provided such name is required to be registered under the terms of the section.

Excerpts from Attorney General Webb's opinion follow:

### General Regulations

"Except as otherwise provided in the next section every person transacting business in this state under a fictitious name and every partnership transacting business in this state under a fictitious name, or a designation not showing the names of the persons interested as partners in such business, must file with the clerk of the county in which his or its principal place of business is situated, a certificate, stating the name in full and the place of residence of such person and stating the names in full of all the members of such partnership and their place of residence."

"It will be noted that this section deals with two classes: first, individuals, and second, partnerships. Under its terms individuals are required to file a certificate only when the name under which they are transacting business are 'fictitious'. On the other hand, partnerships must file certificates when the names under which they are transacting business are either fictitious, or fail to show the names of the persons interested as partners."

"It has been held that if the surname of the person doing business as an individual, or the surnames of all of the partners composing the partnership, appear in the name under which the business is conducted, the name is not fictitious, even though the Christian names or initials do not appear."

"On the other hand, a firm name which in addition to containing the surnames of one or more or all of the partners adds the words 'and Co.' or '& Co.', 'and Son', 'Bros.' or 'Brothers', while not fictitious, is one which fails to show the names of the persons interested as partners. Such names do not necessarily inform third persons desirous of transacting business with the partnership of the exact membership thereof, and hence such a firm must comply with Section 2466."

- (54) 3300 c.y. concrete in centerlines of breast adjustment ditches;
- (55) 2100 c.y. concrete lining in tunnels, adits, and shafts;
- (56) 210 c.y. concrete in control cable-galley extension;
- (57) 85,000 c.y. concrete in spillway crest and piers;
- (58) 2000 c.y. concrete in sidewalks and parapets on dam;
- (59) 1100 c.y. concrete in elevator access and gallery entrances;
- (60) 7100 c.y. concrete in bridges;
- (61) 37,000 c.y. concrete in powerhouse substructure;
- (62) 27,000 c.y. concrete in power house intermediate structure;
- (63) 20,000 c.y. concrete in power house superstructure;
- (64) 12,000 c.y. second-stage concrete in powerhouse;
- (65) 600 c.y. concrete in road training and paving for gantry cranes;
- (66) 21 c.y. concrete in chutes;
- (67) 900 c.y. concrete backfill in shaft, spillways, gutters and chutes;
- (68) 230 c.y. concrete backfill in shaft, spillways, gutters and chutes;

- (69) 41,000 c.y. concrete backfill around penstock pipes;
- (70) 900 cu. ft. concrete backfill in pipes 8-inch nominal diameter and larger;
- (71) 28,000 c.y. concrete backfill in twist adjustment slots;
- (72) 125,000 lbs. furnishing and installing steel tunnel-liner plates;
- (73) 50,000,000 lbs. placing reinforcement bars and fabric;
- (74) 35,000 sq. yds. special finishing of concrete surfaces;
- (75) 2200 recesses finishing lighting recesses;
- (76) 40 c.y. concrete cover around reinforcement-bar dowels;
- (77) 250,000 intersections insulating reinforcement bars and conduit;
- (78) 7100 welds welding reinforcement bars;
- (79) 59,000 lf. removing protective covering from reinforcement bars;
- (80) 23,000 lf. paint reinforcement-bar dowels;
- (81) 700 splices, splicing broken reinforcement bars;
- (82) 500 tests, testing reinforcement-bar dowels and welded splices;
- (83) 8 bulkheads, removing concrete bulkheads in unwatering and pipe galleries;
- (84) 9 bulkheads, removing precast concrete bulkheads covering 30-inch diameter manholes in the unwatering galleries;
- (85) 4000 lf. cutting, bending or removing existing temporary metal sealing strips;
- (86) 4000 lf. repairing and completing installation of existing metal sealing strips;
- (87) 425,000 lf. installing metal sealing strips in contraction and expansion joints;
- (88) 8000 lf. installing metal sealing strips in construction joints in powerhouse;
- (89) 1,400,000 lbs. installing contraction-joints grout tubing and fittings;
- (90) 4,700,000 lbs. installing metal tubing and fittings for concr. cooling system;
- (91) 1,250,000 lbs. dismantling cooling headers and fittings;
- (92) 750,000 lbs. installing cooling headers and fittings;
- (93) 137,000 lf. installing cover plates on grout grooves;
- (94) 147,000 sq. ft. installing expansion-joint filler;
- (95) 11,600 sq. ft. placing joint filler in twist adjustment slots;
- (96) 10,000 sq. ft. removing joint filler from twist adjustment slots;
- (97) 2000 lf. installing timber supports in twist adjustment slots;
- (98) 25,600 c.y. placing sand fill in twist adjustment slots;
- (99) 28,000 c.y. removing sand, gravel, tile, timber and canvas sealing strips from twist adjustment slots;
- (100) 6000 lf. placing and reliequifying asphalt seals;
- (101) 59,000 sq. ft. installing bituminous-mastic felt roofing, complete with flashing;
- (102) 59,000 sq. ft. installing bituminous mastic on roofs;
- (103) 9000 sq. ft. placing 2-in. cork insulation on roofs;
- (104) 800 c.y. lightweight concrete in floors;
- (105) 30,000 sq. yds. placing bonded-concrete floor finish;
- (106) 6000 lf. placing cement wall base;
- (107) 500 sq. ft. manufacturing and placing precast terrazzo floor slabs, 3 inches thick;
- (108) 600 lf. installing terrazzo treads, risers and wall base for stairs;
- (109) 8000 sq. ft. installing bonded-terrazzo floors and landings, 1½ inches thick;
- (110) 5000 sq. ft. installing unbonded-terrazzo floors and landings, 3 inches thick;
- (111) 1500 lf. installing terrazzo-cove wall base;
- (112) 30,000 sq. yds. applying liquid floor hardener;
- (113) 8000 sq. ft. installing glass block panels;
- (114) 120 cubic yards manufacturing and placing precast reinforced-concrete framing members for glass block panels;
- (115) 500 sq. ft. installing structural glass partitions;
- (116) 11,000 sq. ft. installing structural glass wainscot, including base;
- (117) 1100 sq. yds. constructing suspended ceilings;
- (118) 60 sq. yds. hollow walls of metal lath and plaster;
- (119) 1500 sq. yds. plaster on concrete walls and ceilings;
- (120) 500 sq. yds. installing terracotta units;
- (121) 8500 sq. yds. painting concrete walls;
- (122) 2000 sq. ft. installing lead sheet membrane waterproofing;
- (123) 16,000 sq. ft. installing 5-ply bituminous membrane waterproofing;
- (124) 7500 sq. yds. waterproofing of exterior walls;
- (125) 15,300,000 lbs. installing drum gates;
- (126) 1,300,000 lbs. installing drum-gate control mechanisms;
- (127) 5,870,000 lbs. installing gate frames, seats, guides and atop-log seats and guides;
- (128) 600,000 lbs. installing penstock intake gates;
- (129) 725,000 lbs. installing bulkhead gates;
- (130) 290,000 lbs. installing penstock intake gate hoists;
- (131) 26,000,000 lbs. installing outlet control gates, hoists, and metal conduit linings;
- (132) 51,000 lbs. installing operating and control apparatus for hydraulically operated gates;
- (133) 1,850,000 lbs. installing upstream section of each penstock;
- (134) 900,000 lbs. installing pump inlet pipes;
- (135) 1000 holes drilling, tapping, and plugging grout holes in penstocks and pump inlet pipes;
- (136) 375,000 lbs. installing metal pier noses in draft tubes;
- (137) 2,110,000 lbs. installing structural steel;
- (138) 2,660,000 lbs. installing traveling and gantry cranes;
- (139) 1,860,000 lbs. installing trash rails;
- (140) 5,240,000 lbs. installing trash-rail guides and supports;
- (141) 18,600,000 lbs. installing trash-rack sections;
- (142) 43,000 sq. yds. cleaning and painting interior surfaces of penstocks;
- (143) 430,000 lbs. installing metal tubing, brass, steel and cast-iron pipe, fittings, and valves less than 6 inches nominal diameter;
- (144) 4,200,000 lbs. installing metal tubing, brass, steel and cast-iron pipe, fittings, and valves 6 inches and greater, nominal diameter;
- (145) 300 plugs removing leaded-in cast-iron plugs;
- (146) 7 bulkheads, removing grouted-in cast-iron bulkheads;
- (147) 11 covers, removing grouted-in concrete and wooden pipe covers;
- (148) 46,000 lbs. installing steel or iron pipe handrails;
- (149) 10,600 lbs. installing aluminum pipe handrails and curbs;
- (150) 341,000 lbs. installing metal stairways;
- (151) 437,000 lbs. installing metal frames, gratings, platforms and covers for floor openings;
- (152) 50,000 lbs. installing metal drain inlets;
- (153) 9000 lbs. installing metal protectors for concrete edges;
- (154) 100,000 lbs. installing metal bearing-plate assemblies;
- (155) 60,000 lbs. installing drainage and sump pumps and accessories for drainage sewage disposal, and draft-tube unwatering purposes;
- (156) 104,000 lbs. installing oil-storage tanks;

## HARNEY LOW FOR LAGUNA HONDA WORK

**Bids \$55,691 on City Surfacing  
Contract; Fender Job  
Advertised**

Low bids aggregating \$74,641 on four municipal contracts yesterday were received by the Department of Public Works and the Public Utilities Commission.

At the regular meeting of the Department of Public Works, Director William H. Worden called for bids, to be opened January 5, for construction of fenders at Islais Creek Bridge. The job is estimated to cost \$31,000 by City Engineer John J. Casey.

The work involves: 15,000 lineal feet of timber treated piles driven; 50 MBM installing timber wales and appurtenances; and removing present fenders and dolphins, together with installing electrical work.

### Surfacing Job

Charles L. Harney, at \$55,691.30, yesterday submitted the low bid for improvement of Laguna Honda boulevard from Layton street to Plaza. Seven firms submitted bids on the job. The second lowest bidder was Fay Improvement Co., at \$55,783.39 followed by A. G. Raisch at \$55,951.10.

Other bidders included: Pacific States Construction Co., \$56,607; Eaton and Smith, \$61,261.56; Lowrie Paving Co., \$61,518; and Pacific Pavements, Ltd., \$66,653.

On the second largest job of the day, the improvement of Market street, Lowrie Paving Co. submitted the low proposal of \$14,310.50. The contract called for construction of concrete parking strips on the north side of Market street from Grant avenue to Leavenworth street, and on the south side from Sixth to Seventh streets.

### Other Bidders

Other bidders included: A. G. Raisch, \$14,390.50; M. J. Lynch, \$15,372; Leo Epp, \$15,670; E. J. Treacy, \$16,615; Fay Improvement Co., \$17,043.30; Eaton and Smith, \$18,990.50; and Charles L. Harney, \$23,296.50.

Bids were opened by the Public Utilities Commission for installa-

## GOOD NEWS FOR 1938

The U. S. Bureau of Reclamation plans to advertise for bids on Shasta Dam, largest single unit in the Central Valley Project, next March. Construction Engineer Walker R. Young tells members of the Northern California Chapter, A.G.C., at their convention here last week. Caught by the candid camera at the convention are, left to right, Secretary-Manager Floyd O. Booe of the chapter; President B. F. Modglin; Mr. Young; Assistant State Highway Engineer George T. McCoy; and Dr. L. I. Hewes, deputy chief engineer, U. S. Bureau of Public Roads.

tion of sodium vapor lights in the Stockton Street Tunnel. The specifications call for removing 70 existing lamps and installing 19 sodium vapor luminaires.

Lee Electric Company, at \$2449, submitted the low bid, followed by Albert Electric Company, at \$2712. Other bidders included: E. J. Lynch \$2831; Matson Electric Equipment Co., \$2870; Atlas Electric and Engineering Co., \$2895; and R. Flatland, \$2905. Eight firms submitted bids.

Pacific Pavements Co., Ltd., at \$2199.75 submitted the only bid for the improvement of Sweeney street between Boylston and Bowdoin (where not).

Director William H. Worden called for informal bids on two minor jobs. Bids will be opened December 29. The first contract calls for furnishing and installing chain link fence at Laguna Honda School. The other involves sand floors at three primary schools.

## UNION PAVING BIDS SIERRA GRADING JOB

SACRAMENTO, Dec. 22.—Union Paving Co., 212 Babcock building, San Francisco, today submitted the low bid to the State Division of Highways for grading and surfacing about six and three-tenths miles in Nevada and Sierra Cos.

Amount of the low proposal was \$182,337, more than \$34,000 under the next low bid.

Total bids on the contract were as follows:

Union Paving Co.	\$182,337
A. Teichert & Son, Sacramento	214,311
Paula & McEwen, Smith River	236,508

## PLAN TO START DEWATERING OF SITE FOR FAIR

First Work Within Ten Days,  
Says Day; Will Drill  
200 Wells

"Dewatering" of Treasure Island, site of the 1939 Golden Gate International Exposition, will start within ten days as the first step toward making the island suitable for the growth of extensive gardens, according to W. P. Day, director of works.

Two hundred wells, twenty feet deep, will be drilled at various points; water will be pumped therefrom and back into the bay, thus lowering the water table or level of ground water in the island.

"At present the chlorine content of the water in the island is 5,000 parts in a million, but we found through laboratory tests that by lowering the water table we could cut this to 1,000 parts in a million," Day explained.

### Special Fertilizer

"We further found that we could then take this sand and, by applying six to nine inches of fresh water, further reduce the chlorine content from 1,000 parts to 100 parts. The saline tolerance of over ninety per cent of the trees, shrubs, and plants to be used is greater than 100. In a few instances, we will use some type of special fertilizer."

Day disclosed that drainage around the outside of the island being faster, the water level already is low there, the water table being in the shape of a mound with its highest point in the center of the island.

The rains of this winter will provide the necessary six to nine inches of fresh water for the entire island, he expects, so that no artificial "washing" of the soil will be necessary.

### Bids for Topsoil

Bids will soon be called and contract let for 56,000 cubic yards of loam for topsoil. An additional 24,000 cubic yards will be purchased later, making a total of 80,000 cubic yards. Delivery of the loam to the island will start within thirty working days by truck and barge, he said.

Fresh water for culinary and toilet purposes likely will be turned on in January, when a pipeline across the San Francisco-Oakland Bay Bridge is due to be completed and water will be pumped from the Embarcadero to a 3,000,000-gallon reservoir atop Yerba Buena Island.

Planting of the first trees in Treasure Islands \$1,500,000 landscaping program will start in February.

New orders for electrical trucks and trailers totaled 1561 for the first ten months of 1937, as compared with 1,468 amounting to 1125 for the same period in 1936, the

## Bids January 8 On REA Project

Bids for construction of approximately 250 miles of distribution lines for the Plumas-Sierra Rural Electric Cooperative will be opened January 8, Chief Engineer Allan Sickler announced this week. Bids will be opened in the cooperative's office at Blairsden.

Work includes construction of a complete rural electric distribution system, including poles, pole fixtures, primary lines, transformers with accessories, secondary lines, services and incidentals.

The lines will connect with P. G. & E. lines near Quincy and/or the lines of the California Utilities Co. near Janesville.

## URGE EXEMPTION FROM TAXES ON CONSTRUCTION

A meeting with Congressmen from Northern and Central California to ascertain their attitudes concerning several pending measures vital to the construction industry will be sought in January by a special legislative committee from the Central California Chapter, Associated General Contractors of America, according to Secretary-Manager William E. Hague.

Chief among matters which the A.G.C. chapter seeks to discuss with congressmen is a bill which has been endorsed by the national A.G.C., and which would allow exemption under the Revenue Act of 1936 for expenditure of surplus funds for improvements.

The bill has been introduced into the House by Representative Alford Beiter of New York as H.R. 4594. It would add a new subsection to Section II of the 1936 Revenue Act, to read as follows:

### "Expenditures for Improvements"

"The sum of the amounts paid out during the taxable year for the construction or improvement of real property and for the purchase and installation of equipment and machinery, and for the expansion or replacement of plant or other productive facilities, or in payment of debts or portions of debts including interest and carrying charges, as the same may accrue within the taxable year for the construction or improvement of real property and for the purchase and installation of equipment and machinery and for the expansion or replacement of plant or other productive facilities, to the extent that no deduction or allowance is or has been made for such amounts in computing net income."

## BIDS ON BURRIS CREEK DIVERSION TO OPEN JAN. 11

U. S. Engineer Office Advertisements  
Canal, Syphon Project  
In Washington

Bids for construction of the Burris Creek diversion will be opened by the U. S. Engineer Office at Portland January 11, it was announced this week.

The project is located in Drainage Improvement District No. 5 in Cowlitz county, Washington.

Work will include excavation of approximately 8700 feet of canal with adjoining levees, construction of a 42-inch syphon and a 72-inch discharge line, and excavation of lateral drainage ditches.

### Principal Items

Among principal bidding items are 9.1 acres stripping, 9165 cubic yards canal excavation placed in levee with dragline; 12,552 cubic yards canal excavation placed in levee (truck haul); 24,772 cubic yards levee embankment hauled by truck from borrow; 8173 yard miles truck overhaul; 2400 cubic yards excavation for drainage ditches; 3340 board feet untreated lumber in place; and numerous others.

Contractors desiring to figure the project may obtain plans and specifications from the U. S. Engineer Office, 306 Customhouse, Portland, Oregon, upon deposit of \$5.00.

Work will be awarded as a whole to one bidder, it was announced in Portland.

The canal will follow Burris creek in the north end of the improvement district adjacent to the city of Woodland, Wash. In addition to canal, syphon and discharge line construction, the project includes cleaning out the existing tide box.

## PRODUCTION AT COAST LUMBER MILLS STEADY

A total of 177 down and operating mills in Washington and Oregon which reported to the West Coast Lumbermen's Association for the week ending December 11, produced 62,822,935 board feet of lumber. At the rate of cutting at the reporting mills, the entire industry produced 39.9 per cent of its average weekly cut during 1926-29. The new business reported taken last week by the 177 mills was 76,677,022 board feet. Shipments were 67,479,195 feet.

Details of orders and shipments as reported by the 177 mills are:

# State Division of Highways Experiments With Lighting for Accident Prevention

By T. H. DENNIS, Maintenance Engineer  
California State Division of Highways

Highway lighting experiments as an accident prevention measure have been undertaken by the State Division of Highways.

The Division is now installing a 3½-mile section of highway lighting on the Bayshore Highway, U. S. 101, between the south city limits of San Francisco and the north city limits of South San Francisco.

The standards will be set on staggered spacing, 140 feet apart, the lighting to be sodium vapor with 10,000-lumen lamps.

A second installation, 1½ miles in length, is being made on U. S. 101, between the north end of the Golden Gate Bridge and the crest of grade just north of Waldo Tunnel.

On this section, standards will be placed 125 and 150 feet apart at staggered locations between the bridge and the south end of the Waldo Tunnel, and on a 200-foot staggered spacing from the north end of the tunnel to the crest of the grade beyond. This lighting will also be sodium vapor, the lamps generating 10,000 lumens.

## Two Standards

Two types of lighting standards will be used, tapered steel and centrifugally spun concrete. These poles will be thirty feet in length and carry a movable mast arm for suspending the lighting fixture—some two feet inside the pavement edge.

The locations were selected not only to provide a proving ground for the efficiency and cost of such lighting, but also because of particular conditions which might justify warrant installation.

While these installations will mark our first strictly highway lighting experiments as an accident prevention move on the open highway, we have, during the past two years, made some 34 sodium vapor installations at underpasses and highway intersections.

## Policy at Intersections

The locations selected in all cases conformed to the following policy:

1. Intersections which, from their design and location, presented an element of surprise to the approaching driver, and a hazard if he stopped.

2. Intersections where it was necessary to place "Stop" signs against the heavier traffic, especially at "Y" intersections.

3. At cross intersections, where it was found necessary to place 4-way "Stop" signs.

It has been the practice of the Division of Highways to compile and analyze accident records on the various sections of highway for the past eight years. On the entire section of the Bayshore Highway between San Jose and San Francisco, only that portion between South San Francisco and San Francisco shows a type of accident which, if such is possible,

might be eliminated by highway lighting.

## Fog Hazards Involved

On the section selected for lighting north of the Golden Gate Bridge the normal hazards of night fog are complicated by the highly-lighted bridge structure, as well as that of the Waldo Tunnel. Traffic emerging from either the bridge or the tunnel is often confronted with a dense fog, which will likely tend to accidents.

There can be no doubt that the hazard of accident on the rural State highways, measured in terms of vehicle miles traveled, is much greater at night than during the daylight hours. It should be noted, however, that there are very few, if any, types of night accidents which do not also occur during daylight.

We may, and in fact do, find increased frequency of certain types of accidents during darkness, but none which would automatically disappear if daylight were continuous throughout the 24 hours.

## Single-Car Accidents

For instance, in single-car accidents on State highways—for both daylight and darkness—where only a single motor vehicle was involved 54 per cent of all the cases reported was made up of "Speed excessive for conditions," "Pedestrian involved," and "Driver had been drinking."

In two-car accidents, where two or more motor vehicles were involved, we find that "Driver had been drinking," "Speed excessive for conditions," and "Improper passing" again contribute to more than 50 per cent of the total.

On the basis of their occurrence, we discover that accidents involving drivers who had been drinking were over seven times more frequent at night, excessive speed 2.6 times, and improper passing 1.8 times than under daylight conditions.

## Minor Factor

Taking the three minor causes—drinking drivers, excessive speed, and improper passing—which together account for more than half of all causes reported for night accidents, it is clearly apparent that the absence of daylight is only a minor factor in their increase at night. It is difficult to see how the artificial restoration of a portion of daylight can do itself, without the aid of other remedies, be expected to bring about any radical change in these causes.

# ASK PROPOSALS FOR ADDITIONS AT STATE FAIR

State Schedules Bids on Enlargement of Grandstand, Administration Bldg.

SACRAMENTO, Dec. 21. Bids for construction of an addition to the grandstand and of an administration building at Agr cultural Park were invited today by State Architect Geo. B. McDougall.

Proposals will be opened in Sacramento January 18, it was announced.

Work includes construction of a 220-foot extension to the grandstand, and of a one-story and part two-story administration building.

The grandstand extension will be of reinforced concrete, structural steel and brick construction. The administration building, to contain about 15,500 square feet of floor space, will be of reinforced concrete with brick veneer and tile roof.

Proposals will be taken separately for each structure, and under a joint schedule for the two combined.

Separate and combined bids also will be received for each of the following segregated portions of the project: general work, electrical work and mechanical work for the grandstand extension; general work, plumbing work, electrical work, and heating and air conditioning for administration building.

Contractors desiring to figure the project may obtain plans from the office of the State Architect upon deposit of \$25.00.

## J. A. CASSON LOW ON UNDERPASS

CARSON CITY, Nev., Dec. 21.—J. A. Casson, 319 Warren Street, Hayward, Calif., today submitted a low bid of \$49,621 to the Nevada State Highway Directors for construction of a concrete and steel underpass on the state highway about 3 miles northeast of Jean, Clark county, State Highway Engineer Robt. A. Allen announced.

Olof Nelson of Logan, Utah, was second low bidder for the underpass contract with a proposal of \$71,765. Third low bidder was Dodge Construction, Inc., Fallon, Nev., at \$72,152.

However, even the value of the value of highway lighting can come only from the record of well-endorsed experiments. It is noted that much more has been done in the two installations than in the other two.

The Division of Highways is now developing a plan for a 11 Skaggs Street, Berkeley, California, San Francisco, California, and a 11 Skaggs Street, Berkeley, California.

## PAGE PROPOSES COLUMBIA BASIN WORK PROGRAM

### Urges Organization Into Districts; Canal System Plans Underway

Following a series of conferences at Spokane, Wash., Commissioner of Reclamation John C. Page last week recommended to landowners a 3-point program for the development of the 1,200,000-acre Columbia Basin Project.

Outstanding among the recommendations of the Commissioner were the organization of the entire project area into preferably one, but not more than two, irrigation districts; the enactment of State laws necessary to comply with Federal statutes and facilitate the program; the exclusion of existing towns and cities from irrigation districts; and the creating of machinery for excluding also, towns that will grow up later on the project, so that control of the district will be vested in the rural population.

State legislation recommended for enactment would include the ratification of the anti-speculation act to the extent that State jurisdiction and State lands are involved, provision for equitable representation for all parts of a district by authorizing the division of any district into five divisions and the election of one director from each division, and the limitation of assessments in any division to a low figure, perhaps two cents per acre per year until the actual construction of irrigation works in that division is initiated.

#### Anti-Speculation Law

"The anti-speculation law," said Mr. Page, "is a constructive piece of legislation, the principles of which have been applied successfully on projects elsewhere for a number of years, and have proved effective in providing for the disposal of excess holdings at fair values and in protecting settlers against inflated prices. The special problems of the large landowners have been adequately met by provisions in contracts entered into between the Government and the landowners and between the Government and irrigation districts. These contracts prevent operations under the law from becoming burdensome during the period prior to irrigation, and prior to the sale and development of excess lands.

"The time necessary for legal steps required for the organization and confirmation of districts, the negotiation, authorization and confirmation of contracts, and securing necessary State legislation, will be at best almost as much time as will be required for the completion of Grand Coulee Dam, and persistent and orderly effort to complete the district organization and comply with legislative requirements is necessary if interrup-

## State Calls Bids January 13-14 For Alameda Road Project, Two L. A. Jobs

SACRAMENTO, Dec. 21.—The State Highway Commission today authorized bid calls on three contracts for construction of an undercrossing and improvement of bridges in Los Angeles county, and 4.1 miles of grading and surfacing in Alameda county.

Bids on the two Los Angeles county projects will be opened in Los

Anges January 13; bids on the Alameda county job will be opened January 14 in the office of District Engineer Jno. H. Skeggs State Bldg., San Francisco.

The northern California job involves grading and surfacing with plant-mixed surfacing on crusher run base about 4.1 miles of highway in Alameda county. The section is located between Mountain House and the Contra Costa county line.

#### Principal Items

Principal items include: 525 M. gallons of water; 18,900 cu. yds. of unclassified roadway excavation; 9700 cubic yards of imported borrow; 16,000 tons of crusher run base; 5000 tons of mineral aggregate surfacing; 350 tons of liquid asphalt of various types; and 450 lbs. of bar reinforcing steel.

The largest southern California job, for which bids will be opened January 13, involves construction of an undergrade crossing under the tracks of the Southern Pacific Railroad near Rudell station. Grading and surfacing of approaches are included in the contract.

Bids will be received on thirty-four units. Principal items include: 46,000 cubic yards of unclassified excavation; 1650 cubic yards of structural excavation; 10,000 sq. yds. of subgrade for pavement; 144 tons of liquid asphalt of various types; 159,000 pounds of bar reinforcing steel; 30,000 pounds of wrought iron plates; and 2950 lin. ft. of six-inch perforated metal pipe underdrains.

#### Bridge Widening

The third contract calls for widening of bridges across Corral Creek, Solstice Creek and Escondido Creek at points about sixteen miles north of Santa Monica in Los Angeles county.

Principal items include: 1900 cu. yds. of structural excavation; 200,000 pounds of bar reinforcing steel; 1320 cubic yards of Class A Portland cement concrete structures, and 350 cubic yards of existing concrete to be removed and disposed of.

Export shipments of electrical industrial trucks and tractors during the first ten months of 1937 amounted to 72 units, a slight gain over the total of 70 units exported during the first ten months of 1936 according to the Bureau of Census.

Shipments of steel lockers during the first ten months of 1937 amounted to \$4,057,397, as compared to shipments totaling \$2,627,855 for the same period in 1936, the Bureau of Census reports.

ptions of the construction program are to be avoided. During this period there will be sufficient time for a full and complete discussion and understanding of requirements and plans, and for the orderly organizing of the area.

#### Landowners Responsibility

"In the matter of education and organization, the Bureau of Reclamation will cooperate to the fullest extent, but the fact remains that the primary responsibility for organizing the district rests on the landowners. From them must come initiative and primary action.

"Also, I earnestly urge that the State lend official cooperation and leadership, and if need be, physical and financial help, to the work of organizing the Columbia Basin district or districts. Since the development of the project is a matter of state-wide economic importance, such active cooperation on the part of the State administration is appropriate and proper.

"The surveys now being made of the Columbia Basin Project will include an investigation of the economics of pumping water from the Columbia River to lands in southern Franklin County as compared with watering them from the east canal, and the findings will be reported to residents of the areas concerned.

"The construction program for the canal system will be determined and made public well in advance of actual construction. Studies now under way have not gone far enough to determine the program. It will be based on economic and engineering considerations.

"An investigation will also be made of the feasibility of irrigating a considerable area of land in the western part of Walla Walla county.

"The course of the Bureau has not been and will not be determined arbitrarily. Painstaking efforts are made to find and weigh all pertinent facts, and to arrive at the program that will be best to further the development of the affected territory in accordance with the law."

Shipments of fire extinguishing motor apparatus for the first ten months of 1937 amounted to 715 units, a substantial gain over the total of 548 units shipped during the same period last year, according to the Bureau of Census.
